QUESTIONS AND ANSWERS

Question	Answer
Q: Can users be role mapped to both Buyers and Receivers?	A: They can be mapped to both. But, just like in today's world, it is against the procurement rules to receive a delivery that you placed as a buyer.
Q: When marking something as an asset in FI\$Cal, is the item assigned a system generated "Asset Number" like PO or Receipt ID? or can they define the number themselves?	A: Yes, when something is marked as an asset, it is automatically assigned the next available Asset ID. There is also a tag number field that the user can put the barcode number in or the tag number. The asset ID and Tag Number are two separate fields.
